

O'REILLY NUNN FAVIER

surveyors

O'Reilly Nunn Favier is a Surveying Company operating in the Southern Queensland Region.

At ONF, we offer a complete surveying and spatial data gathering services for developers, engineers, government agencies and residents of the region.

Since the company's inception in 2002, ONF have built a solid reputation for professional advice and accurate, on-time delivery of critical data for our clients.

Please visit our website for more information. www.sbsurveys.com.au

1

Land Development

From the simplest realignment of an existing boundary to large staged residential, commercial and unit developments. ONF have the expertise and experience to guide you through each step in the subdivision process.

2

Boundary Surveys

Unsure of where your property boundary is? Or you want to install a new fence and be sure it does not encroach into your neighbours land? Then an Identification Survey might be what you require! ONF will customise the survey to suit your needs.

3

Setout & Feature Surveys

ONF work in conjunction with builders, engineers, architects and project managers to assist in all areas of construction and civil works. From the initial level and feature survey over the land to the accurate positioning of the new building on the site. Whether its a multi-million dollar shopping centre or your family home, ONF have the capability to fulfil your requirements.

4

Mining & Exploration

ONF carry out various surveying activities both directly and indirectly involved with mining and mineral exploration. Our survey team is able to draw on unique experiences ranging from coal, kaolin, limestone & bentonite mining in Central and South East Queensland to seismic exploration surveys in remote Papua New Guinea. Related surveys including borehole locations, water and rail corridors, lease surveys, monitoring and mapping surveys.

5

Hydrographic & Aerial

Water is quickly becoming a valuable commodity that requires sensitive management. ONF undertakes measurement of dry or inundated storage facilities, calculations of graduated storage capacities, assistance with placement of monitoring devices, and plotting the profile of the submerged surface.

ONF have worked in partnership on numerous projects with companies specialising in aerial photography and airborne laser scanning. Depending on your requirements, ONF will advise if an advantage could be gained by utilising aerial measuring techniques.

O'REILLY NUNN FAVIER

About Our Company

ONF Surveyors offer a full range of surveying services, solutions and specialist advice. We cover the greater South East Queensland and the Surat Basin.

The talents of our directors complement each other and the team is completed by our dedicated and experienced employees.

We offer an innovative approach to surveying and strive to maintain the highest standards in every aspect of our business. We have embraced new technologies and we are continuously improving our systems and services. We are a member firm of the Spatial Industries Business Association (SIBA).

Methodologies and resources are matched to each project to ensure cost effective results. Depending on the solution required we may use equipment ranging from a compass and tape through to state-of-the-art satellite positioning equipment.
